

## PRESS RELEASE

### IEEE eScience 2026 Conference to Unite Global Research Community in Naples, Italy

*Naples, 01/28/2026:* The 22nd **IEEE International Conference on eScience (eScience 2026)** will take place **September 28 to October 2, 2026** in **Naples, Italy**, bringing together researchers, developers, and practitioners from around the world to advance collaborative, data- and compute-intensive research. Organized under the auspices of **IEEE**, the event serves as an interdisciplinary forum addressing innovation in computational methods, data analytics, and eScience technologies across domains.

The IEEE eScience conference series aims to **promote and encourage all aspects of eScience and its associated technologies, applications, algorithms, and tools**, with a strong emphasis on practical solutions to emerging research challenges. Interpreted in its broadest sense, eScience fosters innovation across the research lifecycle—from formulating questions and large-scale simulations to data sharing, reproducibility, and knowledge reuse across disciplines ranging from physical sciences and engineering to social sciences, arts, and humanities.

The **2026 edition in Naples** will be hosted by the **University of Naples “Parthenope”**, offering an exceptional venue for high-impact scientific exchange **in the historical Villa Doria D’Angri**, a 19th-century neoclassical building overlooking the Gulf of Naples. The programme will feature an international lineup of speakers and experts presenting **keynotes, technical presentations, workshops, tutorials, and poster sessions**, alongside co-located events such as the **7th Global Research Platform Workshop**. Participants can engage in discussions on topics including high-performance computing (HPC), cloud, IoT, artificial intelligence and machine learning methods, and FAIR data practices.
